

# CS595 Assignment 2

Jon Robison

September 22, 2013

Q1. Write a Python program that extracts 1000 unique links from Twitter  
See Appendix A for python program  
See Appendix B for 1000 unique links

Q2. Download the TimeMaps for each of the target URIs... Create a histogram of URIs vs. number of Mementos.

Q3. Estimate the age of each of the 1000 URIs using the "Carbon Date" tool... For URIs that have  $> 0$  Mementos and an estimated creation date, create a graph with age (in days) on one axis and number of mementos on the other.
